RE: 214 Radcliff Dr. (Yassky_Rooftop Solar)

Project Narrative:

Proposed rooftop solar array for residence located at 214 Radcliff Dr, Nyack, NY 10960 Total system size will be 16.66kW consisting of (49) LG 340W panels with Enphase Energy Micro-Inverters installed behind (underneath) the panels. Panel features include anti-glare with black framing. Panels are proposed to be installed in symmetrical and uniform arrays on hipped roof planes and rectangular arrays on gabled roof planes.

Please refer to engineering plans provided for layout specifications.
